EMC Innovations

## Product description

### At a glance ...

For process measurement and control equipment an increasingly higher level of protection against failure is required.

The shielding and the earthing of the shields is very important.

The area where the cable shield is connected to the enclosure earth/ ground is a critical point. It is very important that the connection has a low resistance.

### Benefits ...

**1. Flexible**

Because of the many different types of DIN rails and screw type assemblies, Icotek offers numerous mounting options.

**2. Fast and tool free assembly**

Strip the cable shield - press in - ready.

**3. Secure hold**

Properly sized and used in conjunction with cable ties, provides strain relief in accordance with VDE.

**4. Large contact area**

The SKL shield clamps offer a large contact area to the cable shield (see picture A). In comparison to conventional shield clamps we can achieve a up to 50% higher contact area when using the SKL line. The specified clamping range can be exceeded up to 10%.

**5. Greatly reduces high frequency interferences**

In large frequency fields, the SKL shield clamps provide low resistance. Effective range up to 1,000 MHz below 120 Ohms and 10 KHz to 100 MHz significant below 20 Ohms.

Details can be supplied on request.

## EMC Shield clamps

Type	Order No.	Shield diameter	PU
------	-----------	-----------------	----

### Product description

The shield clamps SFZ/SKL range are used for shielding single cables in combination with strain relief. Simple to use and effective shielding of cables.

Cables are secured with a cable tie. Strain relief in accordance with VDE standards is achieved.

For assembly on 35 mm DIN rails.

SFZ   SKL 1.5 - 3	36850	1.5 - 3.0 mm	10
SFZ   SKL 3 - 6	36855	3.0 - 6.0 mm	10
SFZ   SKL 6 - 8	36860	6.0 - 8.0 mm	10
SFZ   SKL 9 - 11	36865	9.0 - 11 mm	10
SFZ   SKL 12 - 16	36870	12 - 16 mm	10
SFZ   SKL 17 - 22	36875	17 - 22 mm	10
SFZ   SKL 23 - 29	36880	23 - 29 mm	10

### Advantages

- Simple and tool-free assembly
- Vibration-proof, maintenance free
- Strain relief of the cable with shielding in a single device
- Optimal contact of the cable shielding
- Permanent and continuous spring pressure on the cable shield, adjustment of spring load not necessary

## EMC Shield clamps

### Product description

Comparable with type SF|SKL, the SFS|SKL shield clamps are easily mounted on 35 mm DIN-rails.

The staggered arrangement of SFS|SKL provides optimal space utilization. Suitable for applications when there is a need for mounting cables in close proximity.

### Advantages

- High packing density
- Simple and tool-free assembly
- Permanent and continuous pressure on the cable shield - adjustment of the spring pressure is not necessary
- Optimal contact of the cable shielding
- Vibration-proof, maintenance free

## EMC Shield clamps

### Product description

Comparable with the PF|SKL range, the shield clamps can be used for shielding single cables. They are used for mounting on 10x3 mm bus bars.

The PFZ range provides possibility to fix the cable with a cable tie. Strain relief in accordance with VDE standards is achieved.

### Advantages

- Integrated strain relief
- Optimal contact of the cable shield
- Simple and tool-free assembly
- Permanent, continuous pressure on the cable shield, adjustment of the spring load not necessary
- Vibration-proof, maintenance free

## EMC Shield clamps

### Product description

The new range of shield clamps PFS|SCL are designed for a quick and easy mounting by snapping onto 10x3 mm busbars. The very slim shape is ideal for applications with limited space.

### Advantages

- Extremely slim shape
- Optimal contact of the cable shielding
- Simple and tool-free assembly
- Permanent and continuous spring load on the cable shield - no adjustment of the spring load required
- Cost effective solution

## Supports for DIN rails and busbars

### Product description

There are 4 models of supports for mounting bus bars 10 x 3 mm or 35 mm DIN rail. Various supports are available to provide solutions for many different conditions.

Mounting clip (Order-No. 35150) is used for fastening busbars to supports. The support has a M6 female screw thread to fix the mounting clip or the DIN rail with a M6 screw.

### Advantages

- Wide variety of supports with different sizes and design
- Simple assembly of TS-35 DIN rails and 10 x 3 mm bus bars
- Support type D provides possibility to fix 2 TS335 DIN rails

### Specification

Material: Steel, galvanically zinc-plated

# Clamp assembly and design tool

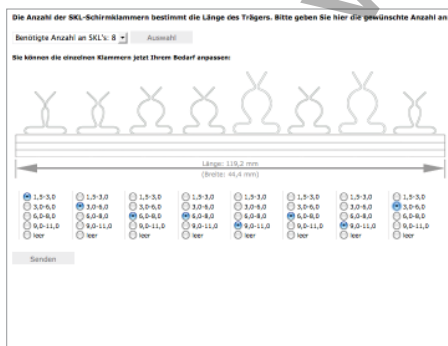

## EMC | shield clamp design tool

By using the EMC shield design tool (located at [www.icotek.de](http://www.icotek.de)) you can create an EMC shield clamp configuration specifically for your application. The following drawings are examples for configurations with 7 and 8 shield clamps.

Example 1:

Clamp assembly 7-piece with SKL 1.5-3 mm

Example 2:

Clamp assembly 8-piece with strain relief and different SKL shield clamps

## Product description

The design tool enables numerous configurations to be utilized on a single carrier which reduces labor time and material costs.

For this purpose use the EMC shield clamp design tool located at

You can quickly configure your own "standard" EMC shield clamp.

We are willing to give you additional information regarding the extensive possibilities of this application.

Our experienced and knowledgeable staff is available to assist you with a solution for your particular application.

## Advantages

- User designed carrier configuration with SKL shield clamps
- Cost effective even for small quantities
- Design online at [www.icotek.de](http://www.icotek.de)

## Specification

RLFZ (x12)	38050	12x SKL	181.6 mm	44.4 mm	1

### Product description

The RLFZ range is a further development of the EMC clamp assembly. The combination of EMC shielding and strain relief is the key feature of this system. Thus the specification according to the VDE standard is achieved.

There are 10 different carriers available, which can be user configured with up to 12 SKL shielding clamps.

The EMC shielding clamps as listed below are available to mount:

- SKL 1.5 - 3 | SKL 3 - 6 | SKL 6 - 8 | SKL 9 - 11

### Advantages

- High packing density due to optimized arrangement
- Possibility to configure custom specific EMC clamp assembly
- Separate strain relief and EMC-shielding
- Online design tool for EMC Clamp assembly

### Product description

The SF|RLFZ range is based upon the RLFZ clamp assembly, which is mounted on SNAP-feet for 35 mm DIN rails shape H.

There are 10 different carriers available, which can be user configured with up to 12 SKL shielding clamps.

The EMC shielding clamps as listed below are available to mount:

- SKL 1.5 - 3 | SKL 3 - 6 | SKL 6 - 8 | SKL 9 - 11

### Advantages

- High packing density due to optimized arrangement
- Possibility to configure custom specific EMC clamp assembly

# STFZ | SKL EMC - Terminal clamp

## Application STFZ | SKL terminal clamp

- **Bosch Rexroth**  
IP2o Inline Module
- **Beckhoff Automation**  
All EtherCAT terminals and KS/KL terminals. The terminals 4 and 8 must not be used for signal I/O.
- **PHOENIX CONTACT**  
All terminals of the INLINE range. The terminals 1.4 and 2.4 must not be used for signal I/O.
- **Pilz GmbH**  
All PSSu-Modules with shield terminals 13 and 23
- **Siemens**  
All terminals of the ET200s range. Terminals 4 and 8 must not be used for signal I/O.
- **TURCK**  
For terminals of the BL2o I/O system.
- **VIPA SLIO**  
All terminals of the SLIO range. Terminals 4+8 must not be used for signal I/O.
- **WAGO**  
All terminals of the WAGO I/O Systems 750. Terminals 4 and 8 must not be used for signal I/O.

Further manufacturers upon request.

## Product description

The EMC terminal clamps STFZ|SKL combines the functions strain relief, cable guidance and shielding of signal cables. Available in two version for 1 or 2 lines.

The STFZ2 is used for analog I/O modules using two actuators / sensors.

The STFZ|SKL EMC terminal clamp is compatible to following bus modules:

## Product description

STFZ I/O Insert Tool for quick and easy mounting of STFZ terminal clamps.

Order No. 61430

# STFZ | SKL

## EMC - Terminal clamp, single

Type	Shield diameter	Order No.	PU
------	-----------------	-----------	----

### Product description

The STFZ | SKL EMC terminal clamp provides strain relief, cable guidance, and shielding for decentralized bus-modules (see compatibility table page 85).

The EMC shielding clamps as listed below are available to mount:

- SKL 1.5 - 3 | SKL 3 - 6 | SKL 6 - 8

STFZ   SKL 1.5 - 3.0	1.5 - 3.0 mm	37510.1	10
STFZ   SKL 3 - 6	3 - 6 mm	37510.2	10
STFZ   SKL 6 - 8	6 - 8 mm	37510.3	10
STFZ	EMC - terminal clamp single	37510	10

### Advantages

- Shielding of signal cables close to the terminal
- Strain relief and cable management direct on the bus module

### Specification

#### Material

SKL 1.5-3 / SKL 3-6	Stainless steel zinc-plated
from SKL 6-8	Spring steel, zinc-plated

## EMC - Terminal clamp, double

### Product description

The STFZ EMC terminal clamp provides strain relief, cable guidance and shielding for decentralized bus-modules (see compatibility table page 85).  
Version for analog I/O modules using two actuators / sensors.

The EMC shielding clamps as listed below are available to mount:

- SKL 1.5 - 3 | SKL 3 - 6 | SKL 6 - 8

### Advantages

- Shielding of signal cables close to the terminal
- Strain relief and cable management direct on the bus module

## Customized solutions

### EMC | Customized solutions

#### Product description

Aside from our standard product offering, we offer customized solutions for your application - even for small quantities!

A wide range of standard clamp assemblies are already available (see pages 82 - 84).

If a standard EMC clamp assembly is not practicable, a custom designed carrier for shield clamps can be supplied.

We look forward to sharing our ideas and custom EMC solutions with you.

4

#### Advantages

- Supply of custom designed carriers for SKL shield clamps
- Cost effective even for small quantities
- Available for a wide range of cable diameters

#### Specification

##### Material

Carrier	According to specification
SKL 1.5-3 / SKL 3-6	Stainless steel zinc-plated
from SKL 6-8	Spring steel zinc-plated

## Leakage and Impedance

All icotek shield clamps have been tested utilizing various frequency ranges and in all tests there was minimal leakage.

Therefore, icotek EMC clamps are proven to absorb EMC disturbances.

Electrical impedance values:  
- from 10 kHz to 100 MHz under 20 Ohm  
- up to 1,000 MHz under 120 Ohm

The unique design of icotek's shield clamps effectively reduce high frequency interferences.

## Contact area

The SKL shield clamps offer a large contact area to the cable shield (see picture A).

In comparison to conventional shield clamps, up to 50% higher contact area is achieved when using the the SKL product line.

## EMC Shield clamps

### Product description

Shield clamps can be used where the shield of single cables has to be grounded.

Shield clamps can be assembled on a mounting plate with screws, with SF-feet in DIN-rails shape C or with SF-feet on 35 mm DIN-rails shape H.

### Advantages

- Simple assembly onto TS-35 DIN rails and 10 x 3 mm busbars
- Various sizes and possibilities for fixing

### Specification

<b>Material</b>	
SK-clamp	Steel, galvanically zinc-plated
SF-foot	Spring steel

# KEL - EMC - Z

## Cable assembly with strain relief

Type	Order No.	No. of teeth	Fastening	Fits for:	PU
------	-----------	--------------	-----------	-----------	----

### Product description

Cable entry, EMC shield and strain relief - all in one location!

Cables pass through the KEL frame and insert directly to the EMC and strain relief.

Simply insert the cable shield into the shield clamp and secure the cable jacket to the strain relief. Two separate functions acc. to regulations - carried out quickly and easily!

Custom configurations are available for shield clamps up to 16mm in diameter with minimal order quantities and lead time.

### Advantages

- Large surface contact between cable shield and housing/cabinet, especially with conductive coating on treated surfaces
- Sealing by outer cable jacket - EMC shielding by cable shield (in acc. with regulations)
- Combined routing and fastening with the KEL Cable entry system
- Available without SKL shield clamps if only additional strain relief desired
- Connection of earthing tape M6

### Specification

Material            Steel, zinc-plated

### Accessories

KEL - EMC - PF 24	KEL - E5 KEL 24   x	39180	140.0 mm	130.0 mm	1

## Product description

The EMC-bracket with the matching PF|SKL EMC-shield clamp is perfect in conjunction with the KEL cable entry frame for alleviating interferences due to shields.

The EMC clamp is assembled inside the control cabinet. The same fixing screws for the assembly of the KEL frame on the control cabinet are used for this process. A female screw thread M5 is already integrated in the KEL-EMC-PF bracket.

Depending on the cable diameter, the corresponding PF|SKL EMC shield clamp can be snapped onto the EMC bracket.

## Advantages

- Very high flexibility in terms of cable diameter
- Large-surface contact of the cable shield
- Permanent spring pressure on the cable shield
- Simple assembly

## Specification

Material Steel, galvanically zinc-plated

## Cable assembly

Type	Order No.	No. of teeth	Fastening	Fits for	PU
------	-----------	--------------	-----------	----------	----

### Product description

Installation of pre-terminated cables without shield interruption.

### Advantages

- Direct, easy and quick contact to the enclosure
- Space-saving, up to 10 cables with two-row model
- Replacement for EMC cable glands, even for pre-terminated cables
- Low-resistance shield contact
- Seal via cable jacket - not via shield - higher protection as a result

### Specification

Material      Stainless steel

KVT-EMC-32   SKL 9 - 11	37181.4	9 - 11 mm	5

### Product description

The KVT-EMC brackets in combination with the split cable glands KVT and QVT combines routing, EMC shielding and strain relief. The connection to earth/ground is possible over the cabinets' wall or earthing tape.

Cables pass through the split cable glands and insert directly into the EMC clamps.

Separate functions according to regulations - carried out quickly and easily!

### Advantages

- Simple and tool free assembly
- Optimal contact of the cable shielding
- Later assembly possible
- Additional M5 hole for earthing tape

### Specification

Material Steel, zinc-plated

Stripping functions

## Stripping tools

Type A: Order No. 61400 Stripping tool for LV cables

- Flexible due to exchangeable hooks for covering a wide diameter range
- Easy to adjust, to use for lengthwise, circular and coil shaped cut
- Cable diameter 4.5 - 40 mm
- Thickness of the Isolation up to 4.5 mm
- Spare blades available with integrated storage compartment in the handle
- The blade returns into home position automatically, thus the danger of breaking the blade is reduced
- Good handling because of an optimized ergonomic shape
- Weight: 116 g

Type B: Order No. 61410 Stripping tool for signal, telephone and data cables

- Precise setting for the different insulations is easily made by means of the 9-position setting wheel
- Diameter range 2.5 - 11 mm
- Thickness of Isolation up to 1.0 mm
- Spare blades available
- Weight: 28 g

## Product description

Professional heavy duty tool for removing cable jacket to expose cable shield material.

Because of the design of the tools hook, cables with diameters up to 40 mm can be removed with only one tool. It is very easy to handle and enables stripping heavy cable jackets under difficult conditions.

By turning the body of the tool the blade can be fixed in one of 3 different positions. Thus circular cuts lengthwise can be made to the cable.

## Product description

High precision tool for dismantling signal-, telephone-, AV- and data cables.

For removal of the most multi wire cables and fiber optics up to a diameter to 11 mm.
